About Me

I am Putra Mahardika, an active mid-semester student majoring in Informatics Engineering, with a strong desire to learn. I possess solid analytical skills, a keen eye for detail, and a strong aspiration to pursue a career in the creative industry.

Education

2023 – Present | Universitas Bina Insani | Bachelor's in Informatics Engineering

This major prepares students to develop and manage systems, including data analysis, database management, programming, and integrating technology with business needs.

2019 - 2022 | SMK Karya Nugraha Bogor | Jurusan Teknik Kendaraan Ringan

This major equips students with skills in the automotive field, particularly in light vehicles. It trains them to perform maintenance and repair work on vehicles.

Achievements

2024 | 2nd Place in IoT Category | INDONERIS IT Competition

Achieved second place in a national-level IoT competition with the project SIBERBUAT. The project focused on a sensor-based and automation solution for fruit object detection using the YOLO v8 algorithm, emphasizing efficiency, innovation, and the implementation of cutting-edge technology.

Skills

2023 – Present | NodeJs

Developed programs such as RestAPI, and others, leveraging Node.js for building efficient and scalable applications.

2024 – Present | Bugcrowd

I have experience in cybersecurity, specializing in vulnerability assessment and penetration testing. I actively contribute to the Bugcrowd platform and have earned points and recognition for reported vulnerabilities. I am listed in the Hall of Fame for platforms such as TheFork-B2C-WNG, TrafficJunky, and Bullish Exchange as a form of appreciation for my contributions to improving their system security. I am highly motivated to continue sharpening my skills in the field of cybersecurity and to contribute to a safer digital ecosystem.
